Low Cost, Fanless, Ruggedized Embedded Controller

The AEC-6831, featuring the Intel® Atom™ Processor, is the latest Embedded Controller in the Aaeon Boxer family. This compact unit features anti-vibration and high temperature tolerance which makes it ideal for the rugged environment.

In addition to the Atom CPU (N270), the AEC-6831 is equipped with DVI + VGA outputs for video functions and a DC power supply that is commonly used in most vehicles and factory equipments. The AEC-6831 can be powered by a DC 9~30V input with low power consumption, yet high performance output. You can also choose an additional external AC power adapter for power redundancy purposes.

While the AEC-6831 is definitely a versatile product, there is no doubt that its rich features were designed to improve fields such as transportation control. From cars to trains to ships, clients rely on specific tools and equipment to run everyday applications. The AEC-6831 looks to meet those challenges and improve processes for an easier lifestyle.

***For a limited time, order a complete integrated AEC-6831 loaded with 2GB RAM, 4GB CFC, and Win XPE for MSRP: \$795.00. New Promotional Price: \$695.00.**

New Intel® Atom™ Embedded Box

- Fanless
- Wide Range Power Input
- COM x 2, USB 2.0 x 4, Audio
- Ideal for Intelligent Transportation System, Factory Automation, and Outdoor Kiosks
- GbE Ethernet x 2
- Low Power/Low Temperature
- AT Power Function
